S&W Recycling Program

Office Paper / Cans / Plastics

Recycling turns materials that would otherwise become waste into valuable resources. Challenge yourself and others to recycle materials whenever possible at home as well as on the job!!!

Did you know that?

- **Recycling one aluminum can** saves enough energy to run a laptop for 4 hours.
- **79 million tons** was diverted from the waste stream in the US in 2010 by recycling efforts.
- Americans use **2,500,000** plastic bottles per hour.
- Only around **27 percent** of plastic bottles in the US are recycled each year.
- Recycling plastic saves **twice** as much energy than incinerating it.

What is your recycling responsibility here at S&W?

- Each facility shall coordinate with a local service provider for recycling office paper, aluminum cans and plastics.
- Each facility shall have appropriate containers for recycling of papers, cans and plastics, or if applicable a mixed-stream of materials (if offered by your recycling service provider). Coordinate with your Environmental Manager/Recycling Coordinator to insure you are using proper containers and including approved recyclable materials.
